I am the best expression of quality, aiming to safeguard both environment and consumer health. My grapes do not encounter systemic chemicals during the vegetative vine growth, enhancing the authentic terroir they come from. As a matter of fact, organic is just a proactive approach to support natural processes that regulate the ecosystem balance.

Organic production is an overall system of farm management and food production that combines best environmental and climate action practices, a high level of biodiversity, the preservation of natural resources and the application of high animal welfare standards and high production standards in line with the demand of a growing number of consumers for products produced using natural substances and processes. Organic production thus plays a dual societal role, where, on the one hand, it provides for a specific market responding to consumer demand for organic products and, on the other hand, it delivers publicly available goods that contribute to the protection of the environment and animal welfare, as well as to rural development.

Regulation (eu) 2018/848 of the european parliament and of the council of 30 may 2018

DOC ( PDO ) Delle Venezie

Alcohol: 12.0%  
Total acidity: 3.2 g/L  
Residual sugar: 3.6 g/L
